

Assignment 3 Reflection

By Emmadullah Bhurgri.

The visit to UTM Digital was a unique and eye opening experience. It displayed the very technology we used in our daily lives within the UTM University and how they all were interlinked to one another like a grand and beautiful web. Thanks to the visit we got to learn about what goes behind the scenes, as how the staff at UTM Digital works due diligently maintaining and working on the IT services including but not limited to UTM Wifi and UTM Smart etc.

We got to visit their offices and sections that worked on a specific area, one of those was the Data Centre Room or Server Room. Due to the privacy and Integrity recording in that place is prohibited which is very important as those servers hold very highly fragile but important data for University and rest.

The Visit was something enlightening to me. As someone who is easily intrigued by wondrous technology, computers and IT, this visit made me excited to be a part of a future where I can also contribute to the society as a whole, similar to how the Staff at UTM Digital performed. It was a awe-inspiring time.
